

MANAGED SERVER HOSTING SOLUTIONS

Depending on your need or reason for choosing ZSL, several or many benefits can be realized. In consultation with you, ZSL will provision, monitor, and manage a custom-configured hardware and network infrastructure purpose-built to its tasks

Managed Services - Available à la Carte

Since every solution is customized to the unique needs it addresses, the following value-added services are available.

- Security (Physical and Network)
- Recovery (Backups and Data Restoration)
- Database Care (for all platforms)
- Storage (dedicated Storage Area Networks with mirrored arrays)
- High-Availability Clustering
- Multi-site Redundancy; Multi-Master Replication
- Enterprise Email

Managed Server Hosting

Managed Server hosting streamlines the efforts of existing IT departments by eliminating the wasting of resources on maintaining network and server uptime while providing security for both.

For an all-inclusive monthly price, ZSL Managed Server Hosting provides and manages customized server hardware (including operating systems) and network infrastructures, freeing up businesses to focus their resources on business-critical tasks.

ZSL will take care of repetitive and day-to-day activities ensuring your uptime and security, while your internal IT department will have more time to spend on application, user, and customer support. In the case of any emergency, ZSL will be the first to respond.

Core Services - Always Included

It is important to realize that ZSL Managed Server Hosting is a full-service package designed to alleviate or entirely prevent service and business disruptions. Included in the monthly fee are services that ZSL considers vital for a successful working relationship, but for which other service providers may charge extra, or may not make available at any cost. Some "Core Services" to consider include:

- Root/Administrator Access
- Unlimited 24/7 service and technical support
- Custom monitoring schemas through the entire stack
- Accelerated response and recovery to any alert or service request
- Rapid hardware replacement
- Operating system patching
- Server and operating system hardening
- A dedicated Sales Executive

Benefits To Your Organization
